

Zenturo® Super

Panels

Zenturo® Super is a complete fencing solution with a high design content. The panels can be used as single panels or for the creation of gable walls.

Product detail

BENEFITS

Extremely high strength

Zenturo Super panels are exceptionally strong due to the narrower meshes (compared to Zenturo panels).

Functional Design

Zenturo Super panels are stronger than Zenturo, through the narrower meshes and thus making them ideally suited for gable walls. In combination with the Zenturo post concept and associated spider fixators, a wide variety of infills can be used to create a personalised aesthetic look.

Easy installation

The Zenturo Super panels can be combined with the Bekacclip posts (to be mounted with collars) or the Zenturo post system (with spider fixators) for gable walls.

Complete system

The complete Zenturo Super system consists of panels in 6 heights, to be installed with 2 types of posts with a specific fixation system, and a Zenturo swing gate. In this way, you design your own unique, secure fencing system.

Security level

Applications

Functionalities

Panels

The Zenturo Super panels are flat panels with double (2D) alternating horizontal wires for added strength. The panels are 2005 mm wide and are available in heights from 655 mm up to 2005 mm.

Mesh sizes: 100x50 and 50x50 mm

Horizontal wire diameter: 5.00 mm

Vertical wire diameter: 4.15 mm

As a finishing touch, we have developed an extra panel (with wire diameter of 3.80 mm) which needs to be fixed at the top of the gabion wall (once the gabion wall has been filled up). It is available in anthracite (BF7016M).

Posts and fixing systems

Bekaclip posts

Bekaclip posts are iron posts with a diameter of 48 mm for easy installation of the Bekafor & Zenturo panels in all conditions.

Zenturo posts (available in concrete or on baseplate)

The Zenturo Post is a rectangular tube with a cross section of 120x40 mm and a wall thickness of 2.00 mm. Galvanised and polyester plastic coated.

Gates

The Zenturo Super system can easily be combined with the Zenturo swing gate (single or double version).

Coating technique

The panels are made of galvanised wire, and an adhesion layer is provided for perfect adhesion with the polyester top coating (min. 100 micron).

The posts are internally and externally galvanised (min. layer thickness 275g/m², both sides combined) according to Euro standard EN 10346, after which an adhesion layer is applied and polyester plastic coated (min. 60 micron).

Panel infills

The Zenturo Super panel can be personalized with different unique and modern infills:

Note: use adapted postdiameters when filling the panels completely with strips.

Pixels

These square and rectangular plastic elements perfectly fit into the panel's different mesh sizes: 100x50 and 50x50 mm. The pixels can be easily clicked on the panel and can be used to form numbers, words or patterns on the fence...

Available in metallic anthracite.

Flexo Strips

The Zenturo Super panels can be filled with the Flexo Strip. The flexible plastic strip is available in 2 widths (44 mm for mesh width 50 mm, 94 mm for mesh with 100 mm) and is woven through the panel's meshes, both in vertical and horizontal direction. Available on rolls of 50 m (to be cut to length), in anthracite.

Perfo Strips

Perforated stainless steel strips with alternating hole pattern (diameter 7mm) available for mesh size 50 mm) and in 2 lengths: 170 cm and 200 cm. The Perfo Strips can be inserted vertically into the Zenturo panel.

The accessories can be fitted at time of installation or later. Zenturo Super allows you to update your style without changing the fence.

The unique Zenturo Post concept for decorative garden gabion walls.

Product detail

BENEFITS

- Aesthetically attractive and unique design with discreet fixators.
- The specific post profile offers optimal rigidity.
- High security factor: hexagonal safety bolts are used for the spider fixing.
- The wall withstands frontal wind loads of up to 120 km/h.

Description

- Rectangular tube
- Section 120 x 40 mm, 2.00 mm
- IV: 17,34 cm³
- Inserts M6 at both sides

Accessories

- Metal spider fixators, hot dip galvanised and polyester plastic coated, are fixed to the post using stainless steel security hexagonal bolts M6 x 40 and stainless steel washers M6 (included in the packaging).
- Plastic post cap, pre-installed to the post.
- Specific Zenturo distance holders to prevent the panels from bulging under the weight of the wall infill. The use of distance holders is a must.

Coating technique

Internally and externally galvanised (275 g/m² both sides combined) and polyester plastic coated (min. 60 micron).
