Applications

Functionalities

Build-in Lock

Frame

The gate frame consists of steel tubes, 60x60x1.5 mm, which are welded at both sides of the Barofoor panel. This results in a very rigid construction. The complete frame is hot dip galvanized and PES coated.

Posts

Each gate has got 2 gate posts, which are included in the packaging. Standard the posts are to be put into concrete. Posts with welded floor plates are available on request.

Post section:

80x80x2 mm (available with or without baseplates)

The gate posts are hot dip galvanized and PES coated and have got a plastic cap. The posts are standard foreseen with holes to enable fixation of Barofoor panels.

Accessories

A box containing all accessories is included with each gate:

- build-in lock with stainless steel cover plates
- symmetrical European cylinder, with 3 keys
- strong hinges, fully reversible left/right and allowing 180° opening of the gate wing.
- aluminum handles
- gate catcher installed on the post or wing
- ground bolt for double swing gates

Coating technique

Both gate wing(s) and posts are hot dip galvanized and PES coated.

Colours

Anthracite RAL 7016, Green RAL 6005, Black RAL 9005, other colours are available on request.
