

Guardian[®] 1000

A HIGHER SECURITY ALTERNATIVE TO CHAIN LINK,
IN ONE FENCING SYSTEM.

Product detail

GUARDIAN 1000 TOTAL SECURITY SYSTEM:

- Seamless security integration
- High visibility 'for combination with CCTV system'
- Very easy and flexible installation
- Simple to upgrade, repair and maintain

Security level

THE VALUE ENGINEERED GUARDIAN 1000 FENCE SYSTEM PROVIDES A HIGH LEVEL OF SECURITY WITH ALL THE ADVANTAGES OF THE GUARDIAN SYSTEM BUT WITH AN INDUSTRY LEADING PRICE POINT.

BENEFITS

Astm tested anti-climb fence

The Guardian Fence System[®] protects against cutting & climbing, through the use of security mesh that has small openings that resist common cutting tools and hand or foot holds.

Engineered design

Steel rails within the Guardian Fence System[®] create a protective conduit for security cabling while providing a superior, fully-integrated security barrier.

Efficient installation

Panels are fixed to steel rails, which themselves are face mounted to steel posts. This fence platform configuration allows for fast installation without needing exact post spacing.

Applications

Functionalities

Panels

The system is combined with our well established high strength, security mesh panels to create an effective anticlimb, anti-climb barrier.

Guardian unions

Guardian Unions securely connect panels to high-strength horizontal rails within the Guardian Fence System® and is then secured with bolted steel straps adding additional rigidity to the fence.

Gates

Choose from our wide range of gate styles such as swing, v-track and cantilever.

Coating

High quality galvanized steel and aluminum components used throughout the system deliver a longer service life.

Warranty

Market leading 10-Year Manufacturer's Warranty.

GUARDIAN 1000 SYSTEM SPECIFICATION

Description	Name	Size	Screening %	% Open area	Thickness		Lbs per 100 sq ft		Short opening size	Long opening size
					Strand Width	Strand Thickness	Plain	Hot Dipped
