

## Guardian 2000

The Guardian Fence System<sup>®</sup> is the original modular steel security fence solution, providing higher strength protection than the best chain link fencing.

### Product detail

- Easy installation, upgrade, repair and maintenance
- Seamless security integration
- 10 year warranty
- Superior anti-corrosion coatings

### BENEFITS

#### Modular design

The Guardian Fence System<sup>®</sup> is the first system to provide a total security solution, from easy installation to complete integration. The innovative modular design, constructed with high-strength security mesh, makes this system ideal for medium security projects.

#### Anti-cut & anti-climb

The Guardian system protects against both cutting and climbing, with heavy gauge mesh and small mesh openings that resist common cutting tools and hand or foot holds.

#### Efficient installation

Panels are affixed to steel rails, which are attached to steel posts. This smart fence platform configuration allows for fast installation which means that exact post spacings are not a requirement.

#### Long service life

High-quality galvanized steel and aluminum components provide for a long service life. The Guardian system is also available with a super-durable Architectural Grade Powder Coating.

### Security level

### Applications

### Functionalities

## Panels

High-strength security mesh panels create an effective anti-cut, anti-climb barrier. Guardian 2000 is offered standard with DutyGuard 3-5-8 or SentryGuard 34-9 mesh. A wide range of alternative mesh options are also available.

## Guardian unions

Extruded aluminum Guardian Unions with panel brackets secure the mesh panels to horizontal rails within the Guardian Fence System®. A Guardian Union cover plate hides installation fixtures from view.

## Posts and rails

Posts are affixed to steel rails, which are attached to the steel posts. This modular configuration allows for fast installation – which means that exact post spacing are not a requirement.

## Gates

Choose from a range of pedestrian, swing, slide, and cantilever gates.

## Coating

Guardian system panels and gates are standard with a superior galvanization, and are available with Betafence USA's exclusive Super-Durable powder coating. This coating provides longer protection from U.V. rays and salt spray than either E-Coat or standard polyester coatings.

## Warranty

The Guardian Fence System® is backed by a 10-Year Manufacturer's Warranty.

## Guardian 2000 Standard Mesh Options

Welded Wire

LouverMesh

Expanded

Description	Name	Size	Screening %	% Open area	Thickness		Lbs per 100 sq ft		Short opening size	Long opening size
