

Guardian 7000

The Guardian Fence System®

An imposing high-security fencing system that provides unrivaled protection combined with integrated raceways for seamless security integration.

Product detail

- ASTM F2781-15 tested and certified
- 4.5 minute Aggressive threat delay**
- Easy installation, upgrade, repair and maintenance
- Seamless security integration
- 10 year warranty
- Anti-Ram barrier integrated into the fence or installed as a stand-alone solution

BENEFITS

ASTM tested protection

Independently tested and certified to ASTM* standards for breakthrough and ballistic resistance. The Guardian 7000 series strongly resists both cutting attempts and ballistic attacks.

Engineered design

Steel rails within the Guardian Fence System® create a protective raceway for security component cabling such as intrusion detection, surveillance, and access control; providing a superior, fully-integrated security barrier. The Guardian Fence System® allows for easy installation, upgrade, repair, and maintenance.

Anti-ram barrier add on available

M30, M40 and M50 Rated Anti-Ram Barriers can be integrated into the Guardian 7000 using the existing posts to provide hostile vehicle mitigation along the perimeter fence line.

Efficient installation

Panels are affixed to steel rails, which are attached to the steel posts. This smart fence platform configuration allows for fast installation – and means that exact post spacings are not a requirement.

*Tested in accordance with ASTM F2781-10 requirements

**Threat levels as determined by ASTM 2781-15 standard

Security level

Applications

Functionalities

ASTM teste and certified panels

The Guardian 7000 System® features double layered mesh that increases both its deterrence and delay characteristics. Tested to ASTM standards it is certified to deliver 4.5 min delay against Aggressive threat level and over 14 minutes against Medium threat level. Additional mesh options are available.

High-security guardian unions

Guardian Unions securely connect panels to high-strength horizontal rails within the Guardian Fence System® and is then secured with bolted steel straps adding additional rigidity to the fence.

Gates

Strong and secure anti-cut, anti-climb, and anti-ram gates are available in a full range of styles.

Coating

Guardian system panels and gates are standard with a superior galvanization, and are available with Betafence USA's exclusive Super-Durable powder coating. This coating provides longer protection from U.V. rays and salt spray than either E-Coat or standard polyester coatings.

Warranty

The Guardian Fence System® is backed by a 10-Year Manufacturer's Warranty.

Anti-ram barrier

The Anti-Ram barrier can either be integrated into the fence or installed as a stand-alone solution, providing formidable resistance to vehicular attack.

Guardian 7000 Standard Mesh Options

Welded Wire

MiniLouver75

Expanded

Description	Name	Size	Screening %	% Open area	Thickness		Lbs per 100 sq ft		Short opening size	Long opening size
					Strand width	Strand Thickness	Plain	Hot Dipped
