

## Securifor® 358 Double Skin

### Panels

Securifor 358 Double Skin is developed for applications where maximum security is essential.

### Product details

### BENEFITS

#### Rigidity and security

The ultimate security panel within the Securifor range. Double Skin gives maximum resistance to attack with a max 12.7 x 12.7mm mesh to the lower panel. An effective deterrent to intruders available in various heights up to 6m – specifically designed for high security.

#### Vandal resistant

The panel incorporates a Double Skin of Securifor mesh (mesh aperture max: 12.7 x 12.7mm) to a height of 2.5m, the finished panel then moves to a single skin of Securifor 358 to the specified system height. Features maximum resistance to the lower panel and combines an anti-climb and anti-cut fence. Manufactured to Home Office approved specification with applications such as prisons and secure units through to nuclear, utilities sites and other maximum risk sites.

#### Attractive and popular solution

The system offers excellent through visibility particularly important for camera surveillance. The ultimate system for providing a high degree of security and discreet visual impact on the immediate environment.

#### Fast installation

All components have been specifically developed to provide a professional product of high quality that can be installed efficiently and rapidly.

### Security Level

High

### Applications

### Functionalities

## Specification
